Senate Bill 657 (as reported without amendment)
Sponsor: Senator Lana Theis
Committee: Education and Career Readiness

CONTENT

The bill would amend the Revised School Code to eliminate a provision prohibiting the interim teaching certificate (ITC) process from allowing an ITC for special education, and to specify that the ITC process would have to conform with applicable requirements within the Federal Every Student Succeeds Act.

Generally, the Code requires the Superintendent of Public Instruction to issue a teaching certificate only to individuals who have passed the applicable examinations or who otherwise meet the Code's requirements. However, the Code requires the Superintendent to establish a process for an individual to earn an ITC that qualifies that individual to teach in public schools and to earn a Michigan teaching certificate. The process must meet all applicable requirements for an alternative teaching certificate process under the Federal No Child Left Behind Act.

The Code may not allow for an ITC for special education.

The bill would remove this language. In addition, the bill specifies that the alternative teaching certification process would have to meet the requirements under the Federal No Child Left Behind Act or the Every Student Succeeds Act, as applicable.

"Elementary certification examination" means that term as defined in Section 1531: a comprehensive examination for elementary certification that has been developed or selected by the superintendent of Public Instruction for demonstrating the applicant's knowledge and understanding of the core subjects normally taught in elementary classrooms and for determining whether or not an applicant is eligible for an elementary level teaching certificate. The bill would remove the reference to this term.

MCL 380.1531i

Legislative Analyst: Dana Adams

FISCAL IMPACT

The bill would have no fiscal impact on State or local government. The changes proposed would reflect Federal policy changes and changes to teacher certification examination that already have been implemented.
