Senate Bill 228
Sponsor: Senator Don Koivisto
Committee: Natural Resources and Environmental Affairs

Date Completed: 3-28-95

SUMMARY OF SENATE BILL 228 as introduced 2-2-95:

The bill would amend the Commercial Fishing Law to require the Department of Natural Resources (DNR) to use the testing data and conclusions obtained from publicly or privately owned laboratories or entities to analyze fish caught under the Law if the analysis of fish were required under State or Federal law, or if it were considered advisable by the DNR. A publicly or privately owned laboratory or entity that analyzed fish under the Law would have to comply with all applicable Federal and State standards and requirements and would have to have the capacity to conduct the necessary laboratory tests.

Proposed MCL 308.1f

Legislative Analyst: L. Burghardt

FISCAL IMPACT

The bill would have no fiscal impact on the Department of Natural Resources. At present, the Department relies on the Department of Agriculture as the regulatory agency on fish health standards.
